The course doesn't intend to teach hard skills and the focus is on the operating language in the authentic materials.*

***Synchronous e-learning means** that the instructor and the students in the course engage with the course content and each other simultaneously, but from different locations, through online platforms.

Evaluation

The creation and presentation of the pitch is one of the most important parts of conveying the structure of any digital media artefact to an audience of clients or users, yet it is routinely overlooked by designers and producers. Our classes are designed to focus on the best slide-writing and the best pitching practices in the industry. The following criteria will offer you a well-rounded assessment throughout the semester:

Motivation, participation and attendance (MPA) 20%

Throughout the semester, you will be graded according to your willingness to participate to discussions, peer-reviews and correction, recommending tools for presentations and attitude towards your instructor and peers. You should limit your device time to in-class activity requirements (during synchronous sessions) and be present and active at all times (for both synchronous and asynchronous activities).

Quiz (Q-1)

You will complete 1 **quiz per semester** related to digital media language (lexical bank and application of general concepts) and presentation techniques. It will also be based on the mandatory readings and listening activities and it will be administered synchronously online, in the final weeks of the term. **No extensions will be granted for this task.**

Final Assignment (FA - 1) 50%

The final assignment will be graded according to: task achievement, slide design, effective command of language, fluency, accuracy, coherence, cohesion, time management and critical thinking.

**The rest of the assignments are formative and they will not receive a grade per se. They will, however, be accounted for on the base of completion.*
